THE BEST EQUIPMENT ADAPTS TO YOUR NEEDS

EASY PUMP ACCESS

Pump enclosures include large, hinged access panels, hinged gauge panels, and brushed stainless steel or black vinyl control panels. Gauges are aligned with valve controls for easy identification.

STORAGE ABUNDANCE

Multiple compartment widths, heights, and depths are available to accommodate various water tank, hose load, and equipment storage requirements.

EASY ACCESS WIRING PANEL

A centrally located electrical panel is provided with aircraft style, waterproof connectors. Wiring diagrams are provided with each unit built.

10-YEAR PAINT WARRANTY

Painted body parts are backed by a 10-year manufacturer’s warranty.

ELECTRICAL SYSTEM

Entire electrical system is engineered and tested prior to installation. All wiring is color and function coded every three inches.

10-YEAR WARRANTY

Painted body parts are backed by a 10-year manufacturer’s warranty.

**EXT BODY**

**PAYING ATTENTION TO THE SMALLEST DETAILS**

At Rosenbauer, the smallest detail is a big deal. We construct each EXT model from our own patented body design, so every part gets just as much attention as the rest. Because the details that go into our trucks are just as important as the results that come with them.

**FULLY PROTECTED WIRING AND LIGHTING**

Wiring is encased within the body extrusions so that water, equipment, and other gear won’t snag or damage it. Lighting is also recessed for protection. Both lights and wiring are easily accessed via built-in flare panels.

**KEEP EQUIPMENT DRY AND PROTECTED**

Roll-up doors open full width and allow the compartments, offering increased storage space and service access. Roll-up doors are isolated in a separate compartment, eliminating moisture inside the storage space.

**DURABLE HINGES DON’T SACRIFICE SPACE**

Compartment doors feature stainless steel hinges, which are concealed and protected from the elements. Offset hinges never extend out of the door opening. Offset hinges also allow doors to open the full width of the compartment.

**STORAGE FROM TOP TO BOTTOM**

Recessed roll-up doors offer adjustable compartment height so that cord reels and other equipment can be attached to the ceiling for added storage.

**EASY ACCESS STEP TO STORAGE AREA**

Lower compartment door panels flip down to provide easy access to upper compartment storage area.

**LIFETIME STRUCTURAL WARRANTY**

The EXT body is backed with an industry-leading lifetime structural warranty.

**STERLING STAINLESS STEEL OPTION**

The Sterling stainless steel body matches the design of the EXT body. In lieu of extruded aluminum, the Sterling body is built with formed 304 stainless steel to the similar dimensions. Multiple compartment widths, heights, and depths are available to accommodate the needs of the fire department. The stainless steel body design is backed by a 20-year structural warranty.

**HIGH-QUALITY WHEEL WELL OPTIONS**

Easily replaceable wheel well housings are available in four-way aluminum, painted aluminum, or stainless steel. Polished stainless fenderettes and high-density radius inner liners are standard.

**EXT BODY PAYING ATTENTION TO THE SMALLEST DETAILS**

- Water Tank Support and Subframe (4"x3")
- Double Wall "I" Beam (4"x2.5")
- Pump Module Extrusion
- Front & Rear Body Corners
- Main Frame Sill (4"x1.75"x5")
- Primary Extrusion (8" x 12")
- "I" Channel (4"x5"")
- Recessed roll-up doors offer full width and above the compartments, offering increased storage space and service access. Roll-up doors are isolated in a separate compartment, eliminating moisture inside the storage space.
