AUTOMATIC DEPLOYMENT

Engineered as part of Rosenbauer’s Clean Cab concept truck, the CleanLocker™ can be auto deployed by a switch in the Officer’s dash panel. Once the park brake is applied, use the switch on the console, the locker deploys to access PPE.

STORAGE FOR CONTAMINATED PPE

Once PPE has been contaminated from a fire scene, your crew can bag the gear and place in the CleanLocker™ for storage back to the cleaning facility. Decon the locker and place clean gear in service.
