

**Best In Class Performance**

- Great for areas without hydrants
- Pump-n-roll capabilities
- Great for drafting
- Carries extra water
- Excellent automatic priming

**Four Wheel Drive Chassis Available**

# MAVERICK

## Rural/Urban Pumper Tanker

When you're in an area without hydrants, this is the pumper tanker you need. Holding up to 2,000 gallons and with a 1250 GPM pump, the Maverick can handle most situations. It is an excellent initial attack pumper tanker.

# ROSENBAUER

## MAVERICK RURAL/URBAN PUMPER TANKER

### Short Wheel Base Chassis

The Maverick chassis is 186" axle to axle with excellent maneuverability.

### Automatic Primer Rosenbauer Exclusive

The hands-free automatic primer allows operator to assist with other tasks, and it can run for extended periods without causing damage or draining the battery. This unit automatically re-primers if the prime is lost.

### PTO Driven Pump

This lightweight, easy to engage pump has no gear clashing and is compact and easy to service. The maintenance-free mechanical seal also reduces service cost. In less than 1 hour, the pump can be completely removed from the truck.

### Large Compartmentation - 1/8" Aluminum Body

With 104 cubic feet of storage space, the Maverick can carry all required equipment and none of the space is used by pump controls. The long-life, lightweight aluminum body is resistant to corrosion.

### Swivel Style Dump Valve Extension

With a 180-degree swivel off the rear, it provides flexibility when off-loading water. The extension meets NFPA requirements.

### High Ground Clearance (Pump does not hang below rails)

The pump's high ground clearance prevents damage from road conditions and keeps it from getting hung up in uneven terrain.

### Engage/Disengage Pump on the Go with Safety Cutout

The cut-out provision prevents pump damage. It's great for pump-and-run operations on large grass fires.

### Pump-n-Roll/NH Series Pump

The pump-n-roll is perfect for grass and brush fires and expands the use of the truck. With up to 100 GPM at 100 PSI at 0-10 mph in forward or reverse, the NH series is the best pump-n-roll pump in its class.

### Up to 1250 GPM

The Maverick has good ISO points and enough capacity for many structure fires.

### Maverick

- Short Wheel Base Chassis - 186 inches axle to axle
- 1250 GPM PTO Driven Pump
- Rosenbauer NH Pump with Pump-n-Roll
- Aluminum Body with Galvanized Subframe
- Automatic Primer Rosenbauer Exclusive
- Swivel Style Dump Valve Extension
- Large Tank Sizes - Up to 2,000 Gallons Available
- Rosenbauer High Pressure Foam System
- Other Pumps Available

### Low Crosslays with Removable Trays

The crosslays are easy to deploy, and the trays are easy to remove for ground level reloading. Personnel do not need to climb on top of the truck, which reduces injuries.

### Large Tank Sizes - Up to 2,000 Gallons Available

The Maverick's tank is large enough for initial attack until other supply units arrive. Made of corrosion-free polypropylene, the tank can also support other apparatus with water.

### Galvanized Subframe

The Maverick's galvanized subframe resists corrosion, is durable enough for off-road use and has a long life.
