

PRODUCT AWARENESS BULLETIN

FROM ROSENBAUER

Bulletin No. 1001C
Quote Writer: Standard
Date: 02/06/07

THIS BULLETIN INCLUDES INFORMATION ABOUT A NEW OR EXISTING OPTION OR FEATURE THAT IS AVAILABLE FOR PRODUCTION.

DESCRIPTION: Pump Control Panel Access

PLANT: Central - Running change in production

SPECIFICATION: When possible the pump compartment and controls will be enclosed using multiple access panels. Up to four (4) panels will be used, each panel dedicated to similar control and function where possible, ie. valve controls, drains, etc. Isolation of controls into individual panels will afford easier access for service and repair without disturbing other controls.

Note: Valve controls are mounted on a stainless steel panel regardless of the pump panel finish. The inclusion of an independent lower panel is determined by the height of the 2.5" pony suction (dictated by the pump model and installation.)
