## **FROM ROSENBAUER**

Bulletin No. 1002C  
Quote Writer: 25-08-1500  
Date: 04/13/07

THIS BULLETIN INCLUDES INFORMATION ABOUT A NEW OR EXISTING OPTION OR FEATURE THAT IS AVAILABLE FOR PRODUCTION.

DESCRIPTION: Digidos Foam Proportioning System - For new apparatus or retrofit on any pump

PLANT: Central, General

SPECIFICATION: Rosenbauer Digidos Foam Proportioning System shall be provided. The system shall use a gear-driven pump as the foam concentrate pump to optimize operational reliability.

The Digidos system shall have precise proportioning rate controls for a constant comparison between the measured water flow and the pre-configured proportioning rate and the foam concentrate flow rate actually injected. During operations, the current water and foam flow rates, and the operation time are shown on the display. After use, the display shows total consumption and operating time. The proportioning rate can be modified at any time during operations. System also does not need to be flushed.

Digidos system includes a foam draft function to re-fill on-board foam tanks.
